share button.

team page.

displays buttons  
for team management  
functionality

slides over  
to show list  
of players for  
given team

(quick view of players  
for selecting line-up  
rather than for all of  
details)

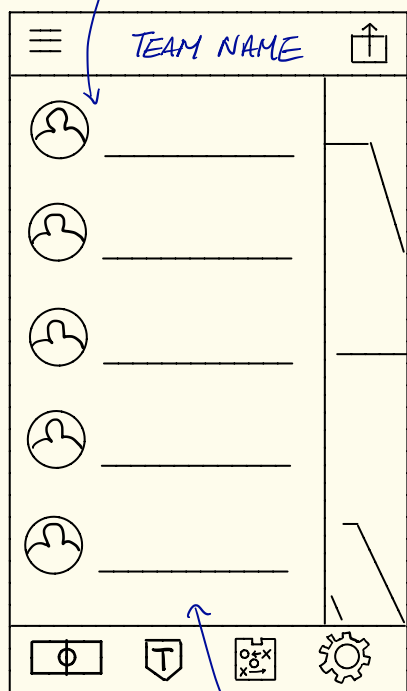

Home, main  
game screen

list of teams currently managing

formations/players list/info  
page

settings (acc info, subscription plan, cloud,  
customization of field design,  
player jerseys, etc)

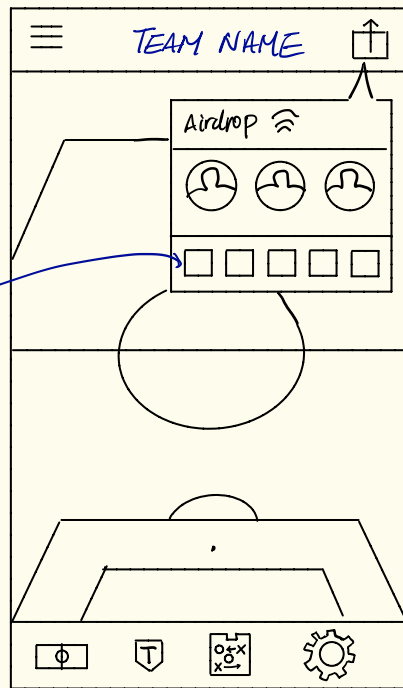

or use  as icon  
instead?

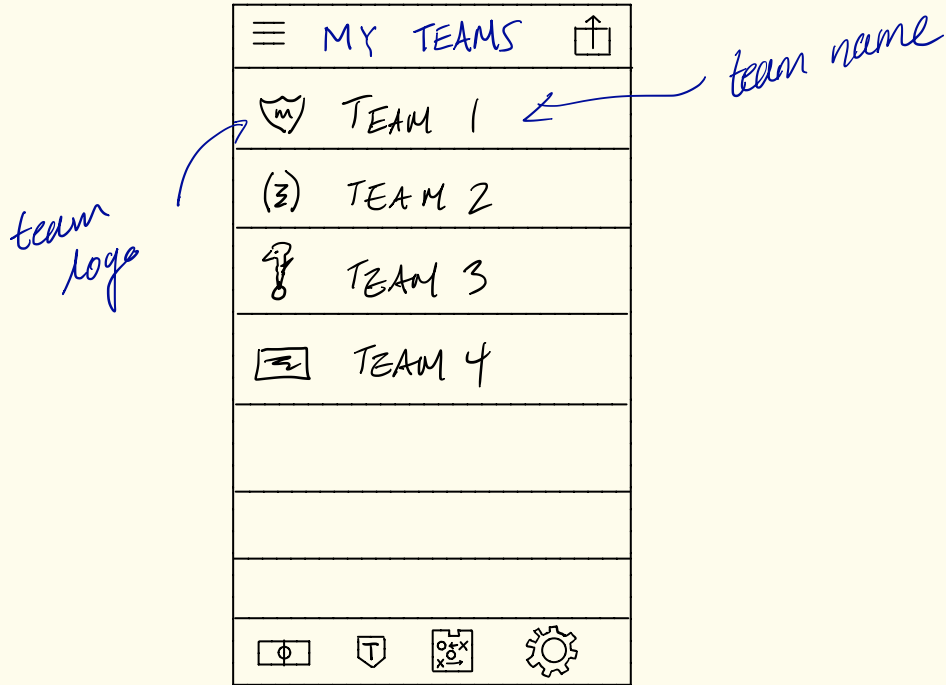

profile picture  
of player

(indicates injured  
players in red)

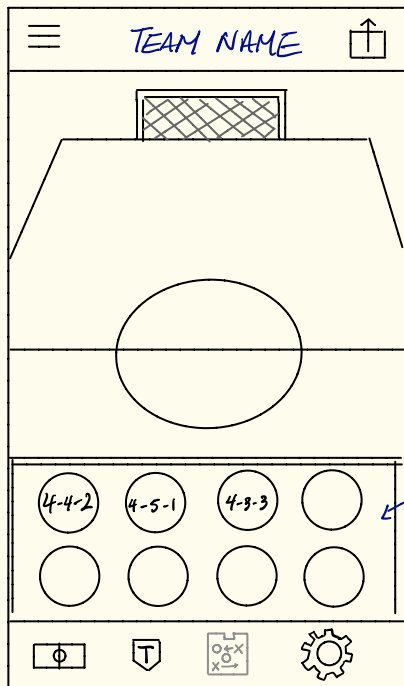

slides  
over to display  
quick player list

different  
apps to  
share to

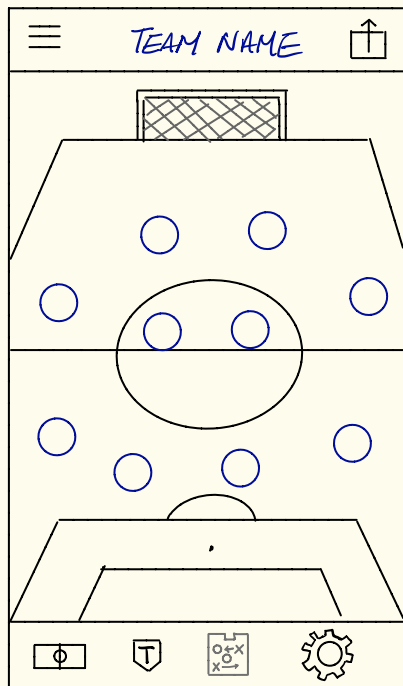

selecting a team takes user back to field and displays last saved on-field players associated with selected team

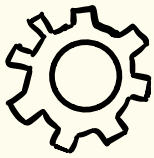

slides up like  
a typing button  
to display formations.

4-4-2

→ upon pressing a formation button, rearrange field players to selected formation

formation navigation bar disappears

these lines  
are only  
for guidelines  
in sketch and  
should not appear  
in app
